1. Course Outline

Please provide a general course outline that identifies the major topics and subtopics included within the course.

2. Learning Objectives

The course must have clear and concise written statements of intended learning outcomes (e.g., measurable behavior performance objectives) for each module/section of the course. The intended learning outcomes should focus on growth in the learners' knowledge, skills, and abilities during or after course completion and be limited to those that can be assessed through a post-test or other appropriate assessment. Bloom's Taxonomy is a good reference for developing learning objectives.

3. Course Content

For example, the curriculum must include an agenda (that includes specific time frames allotted to each topic area and all breaks) and a lesson plan that outlines detailed information on the subject/topic areas, associated talking points, instructional methodologies being used (e.g., lecture, class discussion, activity, video, etc.), and approximate time frames for each section and overall lesson/module. Copies of handouts and/or participant manuals used for the course also should be included, if applicable.

Detailed course content information should be attached as a separate document(s) to the application. Please indicate the type of course content that is attached to this application (check all that apply).
